SUBJECT	CATIDE/L JDIZTAG/UJRANDOM CATIDE Double Agent Case		
ACTION REQUIRED - REFERENCES			
REFERENCE: L 112606, 6 November 1964 21-6 20/3			

1. We are thankful for your assistance and reporting of Reference. A quick check of our files indicates several possibilities which will be reported separately to HQ once the check is complete. In order to pin down the office within CATIDE which handled the case and narrow down the likely suspect we would appreciate any additional information you could furnish along the following lines:

- a. Names used by the CATIDE officers in question, together with descriptions.
- b. The same information and as much detail as possible on the talkative officer.
- c. A description of the suspect if possible.
- d. Exact dates of CATIDERS presence in Copenhagen.

2. We have recently lent CATIDE an audio device for a sensitive D/A operation which might be the one described in Reference. The restaurant in which this audio device was to be used was described by CATIDE as follows:

"The restaurant is in a building that houses a yacht club, a yacht basin being out in front. Large vessels pass by about 500 yards away from the yacht basin. The restaurant is built on pilings (like the U.S. Embassy in Mehlem) and the underneath part is used to park cars. The kitchen and heating plant may also be on this level. On the next level, reached by stairs and a terrace is the restaurant with very large windows overlooking the water. Above that are club rooms of the yacht club. CATIDE has three possibilities: (1) Utilize a room above the restaurant, but it is possible that the reinforced concrete floor could partially block reception and also the room selected might be a long way from

the table utilized by the D/A involved. (2) Utilize a car parked under the restaurant but there are too many possibilities for interference with reception there. (3) The third, and the one CATIDE favors, is to use a large PT type boat or gig that is normally tied-up at the end of a pier right in front of the restaurant. The boat has regular antennas and no one would note anything "fishy" about someone listening to a radio in it. Furthermore, CATIDE is in a position to get the crew off by sending them to town to have a drink and bribe the guard (!), and thus put their own people aboard. The end of the pier is about 150-200 meters from the restaurant".

3. If you could identify this locale, or if anything tells you about the location of the CATIDE operation fits this description, we would be very interested.
